DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-10, drawn to method of generating electrical energy, classified in class 290, subclass 1R.
- II. Claims 11-20, drawn to apparatus for generating electrical energy, classified in class 290, subclass 1A.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as sensing the pulses and using such pulses to pump liquid in a close-loop path with respect to an electrical coil and using the pulses to pump liquid to a coil and from such pumping, generating electricity. Also, Invention II is more directed to a liquid chamber and also discloses a transducer constructed and dimensioned to sense an artery and the heart's pulses. Such requirement is not necessary for Invention I since there are many devices that sense the pulses of the

heart and are not necessarily dimensioned to the heart's dimension. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper and because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Anthony Castorina on 01/18/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
